

Engineering Release Notes
September 14, 2020

WiNG-MGR
Firmware version 3.5.4

- Supports new Wi-Fi sensors: WIFI-LD, WIFI-1WIRE
- Added temperature offset functionality for all temperature sensors
 - Configurable from the Sensor Configuration page
 - Added a "Reset All Offsets" button to Admin->Sensors page to reset all offsets on temperature sensors
- Fixed Daylight Savings Time default start / end dates
- Added Power/Summary relay functionality
 - If this mode is selected the relay will activate at power on and de-activate on any alarm condition (Sensor offline, battery level or sensor reading)
